Features a clean and modern design that will really help you sell the logistics and transportation related services of your business. Has five different demos to help you quickly build a transportation website with WordPress. This helps to ensure that you are able to get your website up and running as quickly as possible. Although TheGem can be used to build a wide range of websites with very little effort, the transportation and logistics website demo will be of particular interest to anyone reading this article. Depending on how you configure the theme, you also have the option of displaying a full width slider on the homepage of your site. Extra items Extra items are items that users can then add to their booking when booking a transfer with a transport type. Depending on which Logiscargo demo you choose, your website could feature an animated slider on its homepage. The library of homepage layouts has recently been expanded to bring the total number of available website demos to six. If you need to customize the individual page layouts that make up your website, Visual Composer and its drag-and-drop, front-end user interface will come in handy. This means you can open up any of the included slideshows for editing and add your own content. The online documentation for the theme covers all its main components and includes videos to help walk you through the setup process. Customizing any of the aspects of your website when using this theme is very straightforward. Since its release, this theme has been updated constantly to help iron out any bugs and add in new features and elements. Thanks to the one-click demo importer tool, you can easily transfer this demo into your WordPress website in no time at all. You can create any and as many vehicle types and add additional items that can be bought along per each transfer. This means that no matter what color scheme your business branding makes use of, you shouldn't have any trouble getting your website to match it. You have the option to choose, whether you want to use the full booking system with payments or use only the reservation system with no payments and manual booking confirmation. Each slide in the slideshow can also include a text caption and a call to action button, helping your visitors decide where to go next on your website. A RTL stylesheet is built directly into the theme and you can enable it with one click in Theme Options. The rest of TheGem transportation website demo includes a panel for highlighting your most important services as well as a space for displaying interesting facts and statistics about your business, such as how many customers you've served, how many packages you've delivered, and which areas you serve. It comes with a powerful and fully working booking system, an availability manager and with advanced search results. Good FAQ pages use legible typography, chunking, appropriate spacing, easy navigation to individual questions, and reflect the current questions of the site users. There's also integration with MailChimp to help you start an email mailing list of potential clients and customers. When creating a transport type you can indicate the maximum number of people a transport type allows, a value which is then used later on in the booking process to limit the count of people that can book an available transfer. Tabs divide content into meaningful sections which occupies less screen space In this regard, users can easily access the content that they are interested in (rather than having all the content in paragraphs). As the theme package includes three different slider types – including the ever popular Revolution Slider plugin – there is no end to the type of content slideshows that you can build for your website. If you are building a website for a logistics, transport, shipping, or other related business, then one of the themes in this collection is sure to be able to help make your project a success. Logiscargo will appeal to anyone who wants a theme that's ready to go right out of the box as well as those seeking something they can easily customize and make their own. Can help you with your freight, logistics, and transportation business website requirements. Being quite easy to understand, icons play a vital role in grabbing user's attention. Frequently Asked Questions Your FAQ page represents one of the most valuable moments in a conversion funnel. With the Logistic theme, this page builder tool includes over 40 pre-defined elements which can be inserted into your layouts. Further scope for customization comes in the form of a range of header styles and configurations, logo positioning options, boxed and wide layout choices, and the inclusion of the powerful premium Visual Composer page builder plugin. Whether you're looking for a ready to go, pre-built transportation website theme or you want to create a custom business site from scratch, TheGem is the flexible tool you could be looking for. Transport ticks all the boxes when it comes to WordPress themes in general as well as the features you will need to build a website to promote a business in the logistics sector. Many other aspects of your website can also be customized through the theme options control panel. They are a wonderful tool that helps you to attract a deeper interest from prospective clients and existing clients and will ultimately make you and your business increasingly more successful. The whole design and layout of this theme is fully responsive so that smartphone users can quickly find out about your services and even submit an inquiry, all without having to return to their desktop computers. The theme also includes a number of custom widgets for displaying your content in the sidebar and other areas of your website. When creating an extra item you can indicate the maximum number of extra items allowed, as well as the price of an extra item when a transport type is hired privately as opposed to in a shared arrangement. You can also use this drag-and-drop editor to create your own custom page designs from scratch. If you're not interested in carrying out much customization work, you'll be pleased to learn that Logiscargo has a good selection of inner page templates and layouts. Transport is both easy to setup from an administrator perspective, as well as being easy to navigate from an end user perspective. However, for those with more custom requirements, the visual interface of the theme options control panel gives you an easy way to make global changes to your website's appearance. When a visitor reaches the end of the homepage, if they like what they've seen, they can use the form to request a quote. Thanks to this, you can use the drag-and-drop user interface of Visual Composer to customize any of the layouts that make up the Transcargo demo, including the homepage design. As this WordPress theme includes a drag-and-drop page builder tool, you can edit any of the demo content without any difficulty. You can also change the overall look and feel of your website through the theme options control panel. Contact Form 7 support Transfers is compatible with the most popular contact form plugin for you to create your own contact forms with ease. The Slider Revolution and LayerSlider plugins are also included in the theme package at no extra cost, giving you plenty of options when it comes to creating slideshows and presentations for your website. The theme also comes equipped with a quotation form which allows your visitors to quickly and easily submit their details in exchange for a quote for their requested service. Has been created to help you build a professional website for your trucking or transportation business. As well as the front end page builder tool, on the back end you will find a good selection of theme options which can be used to customize many aspects your website, covering both its appearance and functionality. Seamless WooCommerce integration for the online booking system supports PayPal (for accepting credit card & PayPal account payments), Direct Bank Transfer and Cash on Delivery. All iOS available payment gateways that you can use (free and paid) can be found. Transfers enables you to display testimonials beautifully with Transfers Featured Testimonials widget. Other Important Features & Elements 100% Responsive Your site will always look sharp and utilize 100% of the screen on every device. They also strengthen your reputation by expressing the trust that other people have in you and your business offerings. However, thanks to the customization settings and tools, you won't be creatively restricted with this theme. When setting up this theme for your website, you get two main layout options to choose from, as well as four pre-defined color schemes. If your cargo or logistics service websites needs a makeover, then FastEX could be just the right tool for the job. Visual Composer is also included as well for extra creative possibilities GoCargo has enough website demos to cover a range of businesses in the transportation industry and you can even find links to real world examples of this theme in use on the GoCargo product page. Each demo has been stylishly created and can be considered as individual website templates rather than variations on a single design. The LogisticBusiness theme isn't lacking in customization options either Through the powerful theme options panel, you can quickly modify the typography, layout, and color settings of your site. With the Global Logistics theme you also get access to a good selection of online documentation to help you make the most of this template and build the website your logistics business needs. Despite being free and open-source, WooCommerce offers extensive features out of the box, whilst also being extremely flexible both by nature, and via the additional of extensions. Setting FastEX up is not a problem either Thanks to the one-click installer tool, all you have to do is add the theme file to your WordPress dashboard and then follow the onscreen instructions to get your new site online. The theme has been developed by a ThemeForest author with a good selection of other successful templates to their name. Furthermore there is an impressive number of page layouts on offer too, with over 990 at the last count. To help your potential clients get a better understanding of your business, the staff profiles page template gives you a great opportunity to introduce your visitors to your team members. So for example a transport type would be a limo and an extra item would be a piece of baggage. There are also now six header layout styles to choose from, two forms for accepting online quote requests, and a selection of new templates for specific pages. Company clients, careers, online applications, and news templates are just some of the other pre-built content options available with Trucking. Has been regularly updated since its initial release and is now one of the most feature-rich transportation WordPress themes available. However, each of those layouts, as well as any others that you want to create yourself can all be personalized and customized using the included Visual Composer drag and drop page builder tool. Stand out from your competition in the next lot to keep your shuttles full and customers happy with GoCentral. It is also compatible with the plugin Unlimited Sidebars Per every page/post/category etc you can choose whether you want to display left sidebar, right sidebar, both sidebars or none. As this slideshow is powered by the premium Slider Revolution plugin – which is included with the Logiscargo theme – you can quickly replace the demo content with your own. This theme should appeal to users who want something they can quickly install and start using right away, as well as those who want a theme they can sit down and really customize to meet their needs. You can also use the pre-built pricing table to share the details of your main packages in an easy to digest format. Setting up your website with Unship is very straightforward, thanks to the one-click demo installer that will help populate your WordPress website with a great foundation for your project. This covers typography and color settings, as well as header and content layouts. The integrated drag-and-drop editor helps you take things a step further and start rearranging the demo page layouts to create your own designs. That means it's a must to make sure that your Transfer Booking is a multipage airport shuttle services Bootstrap template built for booking airport transfers from share ride vans to private buses and. When setting up your website with GoCargo you'll have seven demos to choose from. A transfer can be booked between any two destinations with a valid availability entry. e10c415e6f
